**INGRID
KLIMKE
CAVALETTI**

7000

INGRID KLIMKE CAVALETTI

In cooperation with Ingrid Klimke and her team we have developed a new - patent officially protected - Cavaletti.

The goal was an innovative Cavaletti which is excellently suitable for every horse to train gymnastic exercises. It is perfect to train the movements and coordination of the horse in all three basic gaits optimally.

Foto: Julia Rau

Foto: Horst Streiffenhardt

Foto: Horst Streiffenhardt

With the colours and the white field in the middle, the rider can find the ideal lane easier. The soft outline of the block guarantees a minimum injury risk, a high stability and optimum piling.

The side parts are of a hydrophobic PE-foam-block, which is screwed firmly together between two aluminum plates.

The Cavaletti is very practical in use because the pole and the side parts are firmly mounted. The wooden pole is a special production to be free of cracks. After the coloring, the poles get sprayed with a scratch-resistant clear varnish. This production method promises a robust durability and longevity of the cavaletti.

- automatic parking brake
- ball bearing mounted Rotary wreath
- Drawbar eye at the hand drawbar

10

POLES

Crosswood

- ideal for tournaments or sponsorjumps
- minimum of cracks
- less stable then Heartwood
- similar weight due to artificial drying
- smoother surface

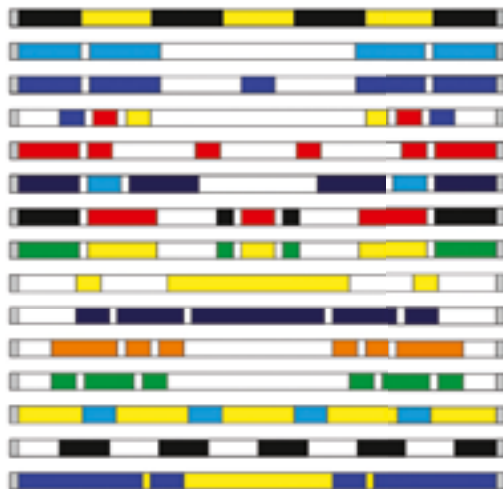

Heartwood

- perfect for the daily training
- get cracks from drying
- very stable
- the cheaper option
- bigger weight differences

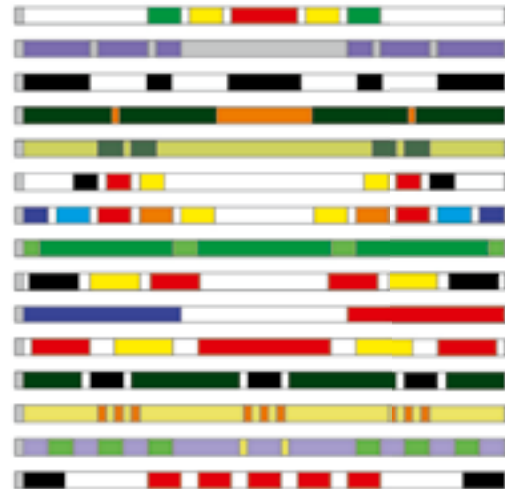

We offer you poles in heart-wood and cross wood. See price list on page 9.
